Tools and Practices: Git, Version Control, Agile, Scrum, Jira, Docker, Kubernetes, CI/CD, GitHub Actions, User Experience (UI/UX) Design, Custom Theme Development, Web Performance Optimization

Leadership: Technical Leadership, Team Leadership, Team Mentoring, Stakeholder Management, Requirements Analysis, Technical Documentation, Project Planning, Client Communication

PROFESSIONAL EXPERIENCE

Analyst – Digital Operations

Xerago, Chennai, India

Jun 2021 – Present

- Promoted from Senior UI Executive Developer to Analyst – Digital Operations, expanding responsibilities from front-end development to technical ownership, solution delivery, team leadership, and cross-functional coordination across 6+ client engagements.
- Led and mentored a cross-functional UI development team, managing task allocation, technical guidance, code reviews, delivery planning, issue resolution, and stakeholder communication.
- Led the development and ongoing maintenance of the Ujjivan Small Finance Bank website on Drupal, implementing custom modules, themes, reusable components, responsive interfaces, content workflows that reduce page load time by 40%, handling 100k+ monthly users.
- Managed Adobe Experience Manager (AEM) content authoring, publishing for **Deutsche Bank**, ensuring consistent digital experiences, content governance, brand standards, publishing workflows, and integrated RESTful APIs validated with Postman and secure payment gateway workflows for **TVS Insurance** and **StriYoga** websites with SonarQube, ESLint testing.
- Architected and developed the Employee Portal Performance System as a single developer, integrating backend APIs, productivity tracking, automated scoring, and a points-based employee ranking engine that replaced manual evaluation processes.
- Contributed to the company's product portfolio by delivering 3 product initiatives: **TrueMeasure** - Web analytics AI audit Tool, **CMS CommandCenter** (AI-powered CMS chatbot), and a **InstoreIntelligence** - Machine Learning-based Face Recognition module with Analytics of customers transaction & history.

Software Engineer - Web Developer

Geval6 Inc Pvt Ltd, Chennai, India

Aug 2019 - Jun 2021

- Developed Flex Community, an Angular 8 job-opportunity platform, implementing 3 role tiers - Admin, Moderator, and Member - with role-based access control.
- Built and maintained PHP and WordPress applications, delivering front-end components and back-end integrations across client projects.
- Translated UI/UX designs into responsive, cross-browser interfaces using Angular 8, jQuery, and Bootstrap.

PHP Web Developer

Webstix Design Pvt Ltd, Chennai, India

Jan 2017 - Jul 2019

- Developed and launched 15+ content websites and 5+ eCommerce sites for the projects and support team using WordPress, Joomla, Magento, and Drupal with CI/CD pipelines production movement.
- Delivered Digital Checklist, an internal product built on CodeIgniter and the MVC framework, that removed paper-based sign-offs from the website delivery process.
- Built Hits and Misses, a quality assurance tracker that surfaced defects and improvement areas to project stakeholders.
- Owned UI/UX delivery from wireframes to final implementation across 20+ website builds, collaborating with designers and developers to keep deliverables on schedule.

KEY PROJECTS

- InstoreIntelligence / DataGold – AI-Powered Retail Intelligence

Built an AI-powered retail intelligence platform for jewelry stores, combining computer vision, face recognition, AI real-time customer tracking, salesperson analytics, and store-floor intelligence.

- MIIP – MarTech Implementation Intelligence Platform

Developed an AI/RAG-powered enterprise implementation platform using LLM integration, Qdrant Vector Database, semantic search, knowledge retrieval, and accelerated execution readiness.

- CommandCenter – AI-Powered CMS Chatbot

Developed an AI chatbot for enterprise CMS platforms, integrating conversational AI, knowledge retrieval, API integration, and platform information discovery.

- Employee Portal Performance System

Architected and developed a full-stack **employee productivity and performance platform** using REST APIs, database integration, automated scoring, ranking algorithms, and interactive dashboards.

- CII TechNext 2022 – Future of Web 3.0

Built and launched a **Web 3.0 event website in under 12 hours** using Bootstrap, JavaScript, PHP, and responsive web technologies, supporting an NFT launch initiative.
